ALLOWANCE

1. Applicants' amendment filed November 6, 2006 is acknowledged and has been entered. Claims 1, 4-11 and 13-30 are now pending in the present application. All rejections have been withdrawn in view of Applicants' amendment to the claims and/or comments.

It is noted that the provisional ODP rejection over 10/817165 has been withdrawn.

The 112, 1st paragraph enablement rejection has been withdrawn upon further review of the state of the art at the time of filing, the specification, submitted declarations and Applicants' remarks. The claimed invention (A method for treating atopic dermatitis, comprising administering to a subject in need of treatment of atopic dermatitis an immunostimulatory oligonucleotide 8 to 100 nucleotides long, comprising: 5' X₁CGX₂3' wherein the C is unmethylated and wherein X₁ and X₂ are nucleotides, wherein X₁ is selected from the group consisting of A, G, and T, and wherein X₂ is selected from the group consisting of C and T, in an effective amount to treat the atopic dermatitis.) is enabled as evidenced in data set forth in the Kline declaration of September 15, 2003 and Example 12 of the instant application. The declaration and specification both teach and enable the claimed method by treating atopic conditions (atopic dermatitis and asthma respectively) in a subject in need of such treatment by administering (i.p.) an immunostimulatory oligonucleotide.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should
